PROFESSIONAL EXPERIENCE

Senior Front-End Developer
Retornar Tecnologia

11/2023 - Present
São Paulo, Brasil

Founded in 2015 in Londrina (PR), Retornar is dedicated to transforming lives through generosity initiatives and automotive content. Inspired by values of kindness, the Institute creates and shares high-quality content about the automotive sector, especially eBooks on the history of national and international icons, such as the Ford Maverick and the VW Beetle. With a specialized team in communication, marketing, design, and technology, Retornar is a reference for enthusiasts, offering a unique experience that connects the past and present of the automotive world.

- Estimated development efforts for tasks and projects.
- Implemented improvements and fixes in existing systems.
- Maintained an organized and functional task pipeline aligned with the team's workflow.
- Develop interactive interfaces with a focus on user experience.
- Performed other job-related activities as directed by superiors.
- Establish visual and layout standards, ensuring consistency in the brand's visual identity.
- Ensure new implementations were tested and fully functional, promoting secure deployments.

Senior Front-End Developer & development leader
Ujamaa Digital - Remote

08/2023 - 11/2024
Internacional Delaware - US

Ujamaa (pronounced "oo-JAH-mah") is built on the principle of cooperative economics—a vision where a community, connected like an extended family, builds businesses together, supports one another, and succeeds collectively. Ujamaa's marketplace is a unique, community-centered platform that transforms community values into market value, fostering partnerships fueled by shared passions.

Ujamaa is a recipient of the ALGO Grant for Applications & Use Cases, awarded for its innovative use of Algorand blockchain technology. Algorand provides a robust, sustainable blockchain infrastructure, known for achieving scalability, decentralization, and security without environmental compromise, supporting Ujamaa's mission to empower communities through sustainable and cooperative economic practices.

- Developed and implemented interactive, user-centered interfaces, ensuring a seamless user experience across Ujamaa's platforms.
- Created new marketplace management applications, optimizing operations and enhancing the efficiency of platform workflows.
- Planned and prioritized system improvements and bug fixes, enhancing the stability and functionality of existing applications.
- Defined and maintained visual and layout standards to create a cohesive brand identity and ensure a high-quality user interface design.
- Oversaw task management pipelines, ensuring smooth task flow and alignment with the team's workflow.
- Conducted testing and validation for new implementations, guaranteeing robust, reliable features before deployment.
- Provided development effort estimates for tasks and projects, enabling efficient planning and resource allocation.
- Delegated tasks within the team while monitoring progress and offering support to ensure timely completion and quality standards.

Senior Front-End Developer
Talenses group

11/2022 - 07/2023
São Paulo, Brasil

A Brazilian holding company with comprehensive recruitment, selection, and human capital solutions for companies of various sectors and sizes. We provide consultative and specialized services, regardless of hierarchical level, with offices in São Paulo and Rio de Janeiro. In permanent recruitment, we connect early-career talents, leadership, and Top Management, C-Level, and Board positions. In staff loan, we recruit experts for project-based roles within organizations. Through Tech Recruiting, we link companies with our community of tech and digital professionals. In inclusive recruiting, we have a dedicated team for affirmative selection processes for corporate roles.
